Notes from Mockup Review
- Serif and sans serif font pairing working really well
- LOVE Mockup B direction
- Gather content mostly from Wikipedia page
- Use similar photography treatment throughout website
    o Having images break up the story could help with flow
- Mostly text to tell the story and images are supplemental, but keep story relatively concise
- For mobile: text placement same as web version
    o Could include some indication for interaction (arrow? Etc.)
    o Mockup B has more space to work with
- Try similar layout for website pages
- Mockup A darker navigation bar could appear when scrolling
- Decided on single page scroll
    o Opportunity to use scrolling navigation
